

Julio Chiu
Founder & CEO
Seisa

Julio Chiu is the founder and CEO of the Seisa Group, a global provider of medical device services, and a visionary business leader bringing advances to the medical manufacturing industry. He also serves on the advisory boards of Bancomext development bank and BBVA Compass commercial bank.

While working as a banker on U.S.-Mexico projects, Mr. Chiu was one of the first to recognize the advantages of combining the economics of the El Paso/Juarez region with the manufacturing supply chains of regulated industries. With hometown roots straddling both sides of the El Paso/Juarez border Mr. Chiu successfully established Seisa Medical in 1983 with the region's economic advantages in mind.

Through the application of Mr. Chiu's business acumen, SEISA Medical has grown from offering a single Fortune 500 medical device firm simple assembly services into a business that provides complex vertically-integrated services that span from development to production to product evolution for many of the largest medical device companies in the world.

A widely respected business leader, Mr. Chiu's expertise has allowed him opportunities to contribute to the development of the El Paso/Juarez region and beyond. He serves as the President of the Northern Branch of CANIETI (Mexico's National Chamber of Electronics, Telecommunications and IT).

Mr. Chiu received a B.Sc. in Electrical Engineering from the University of Texas at El Paso and a Masters of Business Administration from the Simon Graduate School of Business at the University of Rochester in New York. He is an avid golfer and, along with his six grandchildren, is a loyal fan of the El Paso Chihuahuas baseball team.
